EDUCATION

Bachelor of Computer Science, Concordia University

Expected Graduation: June 2026

Montreal, QC

Sept 2022 – Present

- **Member of the Institute of Co-operative (COOP) Institution**
- **Relevant Coursework:** Software Engineering, Web-Based Enterprise App Design, Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Databases, Operating Systems, Java, Mathematics for Computer Science

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL, GLSL (Shaders)
Frameworks & Libraries: React.js, Next.js, FastAPI, Node.js, Express.js, Three.js, React Three Fiber (R3F), Spring Boot
Tools & Databases: PostgreSQL, MongoDB, Redis, Docker, Google Cloud Platform (GCP), Git, VS Code, IntelliJ
Methodologies: Agile (Scrum), RESTful APIs, System Design, Responsive Web Design, Unit Testing

TECHNICAL PROJECTS

ConU Planner – Full-Stack Academic Launchpad & Cloud-First Planning Engine [GitHub] • [Live Link] • *Oct 2025*
Next.js, React, Clerk Auth, FastAPI, PostgreSQL, Chrome Extensions (MV3), Puppeteer, PDF.js, OpenAI API, Resend, Vercel

- Developed a cloud-first academic planning platform with Clerk authentication and server-side state persistence to help 5,000+ students track credits, forecast GPAs, and sequence degrees in a unified interface.
- Engineered a Manifest V3 Chrome Extension that scrapes transcripts from PeopleSoft, complemented by a client-side PDF.js parsing engine to extract credit requirements with ECP exemption rules in under 60 seconds.
- Designed a Topological Sorting Degree Pathfinder that evaluates complex prerequisite chains across 7,900+ courses (supporting CS, Software, and 6+ Engineering curricula) to generate optimal graduation roadmaps.
- Built an automated Live Seat Finder using a Puppeteer-based scraper to extract real-time session times, scaling with dynamic Cron schedules and rate-limiting to prevent server blocking and bypass Vercel timeout limits.
- Implemented bulk user synchronization via Resend API, writing an optimized HTML email distribution script that handles list deduplication, batching restrictions, and individual bounce-safe retry logic.

Aacharya – 3D Celestial Engine & Interactive Visualizer [GitHub] • [Live Link] • *August 2024*
Next.js, Three.js, React Three Fiber (R3F), WebGL, GLSL Shaders, Framer Motion

- Built a client-side astrophysics engine in JavaScript to compute precise sidereal planetary longitudes and coordinate projections (Lahiri Ayanamsa) using local sidereal time (LST) and trigonometric projections.
- Developed an interactive 3D Solar System and Cosmic Galaxy using **React Three Fiber** and custom **GLSL vertex/fragment shaders**, implementing GPU-accelerated star systems with real-time mouse repulsion and twinkle animations.
- Programmed a procedural SVG engine that dynamically renders North-Indian style natal charts (Lagan) at runtime, geometrically mapping 12 celestial houses and Devanagari labels based on computed planetary coordinates.
- Implemented a highly performant 36-point matchmaking algorithm (Ashta Kuta Guna Milan) to calculate complex relationship compatibility metrics in real-time.

WORK EXPERIENCE

Access Research Inc.

Phone Interviewer

Montreal, QC

Jan 2023 – Apr 2023

- Conducted high-volume market research and business surveys, successfully gathering data from 500+ corporate clients while maintaining a 95% standard for data entry accuracy and compliance.
- Resolved high-friction customer interactions using professional active listening and de-escalation techniques, adapting communication style to interface with diverse stakeholder groups.

LEADERSHIP, VOLUNTEERING & ATHLETICS

- **Vice President of Events** – South Asian Student Association (Concordia University) *Sept 2024 – Present*
Planned, funded, and coordinated large-scale social and cultural events celebrating heritage for over 500+ attendees.
- **Volunteer** – People's Potato (Concordia University) *Sept 2023 – May 2024*
Worked in a fast-paced team environment to prepare and distribute free, healthy meals to 300+ students daily.
- **Track & Field Athlete** – District Level Sprints *Sept 2020 – June 2022*
Awarded three consecutive Gold Medals in 100m, 200m, and 400m events; recognized as school's "Best Athlete" for three straight years.
